NSSA was founded in 1983 to meet the needs of children and families touched by autism. Autism is a neurological disorder that affects the ability to learn, to communicate, and to form social relationships. Few diagnoses are as devastating to a family.

The incidence of autism has increased dramatically over the past ten years and continues to rise. Current estimates put the national rate of autism at 1 in 166 births as compared to 1 in 10,000 births a decade ago. This makes autism more common than pediatric cancer, juvenile diabetes, and Down's syndrome.

NSSA is working hard to meet the growing need for its highly specialized programs. Services and support are currently provided to over 200 individuals with autism and their families throughout Long Island.

Our mission is to offer hope to people with autism and their families by providing high quality life-long support through services which enable people with autism to function better in everyday life. NSSA offers the most advanced treatment and training programs for the benefit of people with autism and will continue to pioneer, through research, comprehensive treatment models which can be adopted nationally.
